Hello,

A few thoughts on the plan before the deadline.....

It seems incredibly short sighted to base the plan around the motorway network and bringing huge amounts of HGV traffic off the motorway and into the Warrington area, with all the attendant pollution and congestion that this brings. More should be done to remove freight from roads to the rail network, with the pending advent of HS2 and possible West-East upgrades.

By concentrating all the housing development around Appleton Thorn the traffic congestion on feeder roads will be intense. Warrington used to boast that it had sufficient brown field sites to fulfil their housing needs for years and years- why are these brown field sites being not being exploited?

It is difficult to see how such a big community will integrate into the local community rather than remain a separate entity.

Regards

Mick + Liz Muddimer
