Robert and Norma hall

[REDACTED] I strongly object to any more plans to build any more houses and industrial sites in, around and near our once peaceful village. so much for air pollution and global warming and traffic congestion. we have enough of that as it is how can the planners approve these plans they are or must be crazy. they want to try living here and how will this affect our house prices. what about our children and our local schools all that traffic and pollution is bound to affect them. do we the ordinary people of this country not have a say in how we want to live.

Yours angrily R Hall.
