Sara Brogan, [REDACTED]

I am writing to put forward my objections as follows:

Violation of greenbelt land there are no special circumstances to release the Greenbelt for new build commercial Premises or new houses.

The pollution and additional traffic will have an impact on our families lives – we already have the worst record in the country for emission and there is a proven link between pollution and respiratory health.

We chose to live in a village the proposed building of £7400 new houses will have a profound effect on the character and landscape of the village.

Additional HGV traffic (which is already a danger) 2,000 vehicles per hour – which will bring about noise, pollution, litter, unnecessary disruption and traffic chaos!

Concrete Jungle – you are proposing to turn villages into concrete jungles with over population , more traffic, more population – using greenbelt to deliver this is not in Warrington's best interests.
