The congestion in Warrington is there for all to see and issues facing us from parking for more and more family cars, white vans, Clyde port Authority etc, etc. To establish another 5,000 homes in Warrington when there is increasing difficulty currently with traffic flow which is proving particularly troublesome by the very nature of Warrington and its accommodation of waterways. It is paramount to lay a foundations for a plan and the construction of infrastructure to compliment this expanding city is a must. It is also objectionable that 'Green belt' is being used to furnish this Plan. Surely Warrington must retain its admirable aspect in providing areas of fauna, trees, grass verges etc. Don't giveaway your Green Belt for the Green Dollar !! The overflow from the M56/M6 alone, when there is an accident is horrendous and all of this pours down London Road and results in gridlock in the city centre.
