I object to this plan as Warrington has one of the worst records of air pollution in the country. Building the proposed number of houses and warehouses on Greenbelt land is not justified. This will mean our air pollution in Warrington is going to get a lot worse, as we need the greenery to help us breathe and keep the animal habitat safe. Also the name is Greenbelt land and if you get rid of all the greenery and put houses in its place it won't be green anymore.
