Subject: Warrington local development plan
Date: 17 June 2019 17:00:04

Dear Sir / Madam

I am contacting you to express my grave concerns regarding the local development plans, particularly for south Warrington. The amount of greenbelt that is to be destroyed for these plans is utterly unacceptable, especially considering the WHO's damning claim that Warrington is one of the most polluted towns in Europe.

Having looked at the plans and attended several presentations it is clear that the proposed transport plans cannot hope to cope with the enormous increase in the volume of traffic which will be added to the roads in south Warrington. With the announced closure of Fiddlers ferry power station a complete re-thing on the development plans must happen. The towns housing needs can be delivered on brown field site without the destruction of essential greenbelt.

The transport, housing and Six56 development plans are completely unsound and unsuitable for the town especially south Warrington.

Regards

Vivienne Horlock
