Subject: Objection to Warrington Local Plan
Date: 17 June 2019 08:27:48

I am writing to let you know that I oppose your local development plan for Warrington. I do not believe you have correctly calculated the number of new houses needed and also you are incorrectly over investing in cheap low growth industries. Most of this you want to develop on green belt. This must not happen, you must not use the greenbelt for housing or warehousing.

Your plans to build on greenbelt will ruin the local environment for locals and wildlife. Removing the farmland takes to pollution buffer away and result in more ill residents, mainly the young and old. You will also be filling this with housed and warehouses so more cars and lorries in the area polluting the local environment when Warrington is already one of the most polluted placed in the UK.

Your plan will also create more congestion cross the bridges and at the motorway junctions, where there will be little if no improvement. We are assuming you plans were put together by someone who does not live in Warrington, they just saw green space on a map to be filled in, not having an understanding of the congestions implications this will have.

Your calculated of housing has already been shown to be wrong and that you are trying to build too many houses. The number of houses you actually need can be built on brownfield sites and you can start with the centre of Warrington. This is an embarrassment. We do not take family or friends into Warrington as it is a dump. Instead we drive to Manchester, Liverpool and Altrincham. If I have to go into town I am in and out as quick as possible. This should be a place to spend time, not a unpleasant environment full of kids vaping and fighting. You need to change the feel of the town and building homes in the centre you help this greatly.

I challenge you to re submitted your plan and be a forward thinking town using every inch of brownfield site with innovated green properties rather than you current plan for overly prices regular boxes on greenfield. You have a chance to be different and to be a leader for change, not following to hordes to fill in the greenfield gaps. I wonder what we will call the new environment we are building St Helnorwarwidrun?

Thanks

Gill Chadwick
