Dear Sirs

I am writing to express my great concern re the supposedly updated Local Plan.

Details of the planned roads are very vague. Specifically there is nothing planned to improve the already extremely congested A49 as it goes north from the M56. Has anyone actually monitored the traffic as it goes through Stockton Heath for instance?

I am concerned also regarding the risk of our Green Belt being sacrificed for the sake of this seemingly over ambitious Plan. Can I ask which develops were involved in the consultation of this plan?

What is practically achievable and at what cost - financially and environmentally. What proportion of the the new housing will actually be affordable for local people?

Your comments would be appreciated.

Yours faithfully
B. Heath (Mrs)
