Dear Sir/Madam,

Traffic congestion in Warrington
You could do a google search for Traffic Congestion in Warrington.
You ought to get a list of percentage of the time the road is congested.
Copy the list.
Then delete from the list roadworks.
Then sort the list in order of highest percentage congested first.
Get estimates of congestion reducing road improvements.
Then decide which congested roads to improve.

It is important to avoid bias as to which roads to improve.

Best Regards from,

Richard Lawrence Joesph Cooke
