Dear Sirs

I feel compelled to write to strongly object to the proposed local plan which if it proceeds will forever destroy a semi rural environment.

The proposals are on a scale which is totally unacceptable and will have a disproportionate affect on residents living near by both in terms of the pollution generated and the massive disruption and growth in vehicle traffic that it will generate. It is not acceptable to destroy existing communities just to provide excessive further housing where brown field sites should be used to satisfy demand. It is not needed and should be rejected. Lastly to do this on greenbelt land is a disgrace. It is greenbelt so as to place restrictions on undue development and to maintain a reasonable environment for people to live in.

The plans are massively excessive and will destroy the local area for ever. Local people should not be ignored. 50% of the proposed scale would still be way too much.
