To whom it may concern

We oppose the development plans for south Warrington for the following reasons :-

1. There will be a huge increase in traffic and pollution which can cause long term conditions such as asthma , other chronic breathing problems , cancers , hypertension and stress related conditions . The current pollution levels are already higher than what they should be which is evidence on local data . The current infrastructure such as healthcare systems , schools , pharmacies, roads, shops etc do not support the provision of so many houses and the area will be too saturated with housing . We already que in traffic to get onto the motorway which will be kerb crawling ... this situation is already a problem without adding to it.
2. There will be a huge loss of green belt land which will be lost forever yet it is suppose to be protected . Warrington has many areas of brisk land that can be built on yet green belt labs us being chosen ... it is the green belt land that makes Warrington south attractive and this aspect will be lost not to mention all of the wildlife that lives in this area.

Kind regards

Sharon Sayer

and Dave Williams
