Dear Sir / Madam

Re: Councils Preferred Development Option Consultation - Proposed building in Croft.

In addition to my written objection to the above proposals for the development of farmland in Croft for housing, please see below a link to a live petition which has so far been signed by 60 individuals.

<http://you.38degrees.org.uk/petitions/stop-300-houses-in-croft>

I'm sure you will agree that it is important for the Council to listen to the community they represent by means both traditional and modern. Petition sites such as 38 Degrees on social media have become a key feature the way politicians and government acknowledge and hear the views of the people, particularly younger people. Should you suggest that this petition is not admissible and chose to ignore these voices, you would be willfully devaluing the views of the people you are duty-bound to represent.

Please include these important, heartfelt objections to the plans that you are considering.

Thank you
