Subject: Planning Application

Many people in the Red Lane area of Appleton have received a document concerning a proposed housing development off Red Lane. I have spoken to someone in the Planning Department who told me that the Planning Policy Department say that no application has been made and that the areas shown in the document have not been included in the 20 year Local Plan as they were considered unsuitable. I believe Planning Policy should issue a formal statement to this effect to put peoples minds at rest. However, when I try and telephone the department on [REDACTED] a recorded voice tells one to key in their ID and then tells you "your login has failed".

Would you please pass on this message to Planning Policy with a request that they issue a formal statement that there is no proposal to build 495 houses as described in the document.

Regards
