Dear Karen Mundry and Hans Mundry,

I received through my letter box yesterday, 02/09/17, a small leaflet about the proposed new road along the disused railway embankment. To say I was horrified is a slight understatement! I live with my family on [REDACTED] very close to the said embankment and the thought of the noise, pollution and totally disruption this would cause disgusts me How can areas that it affects little namely Birchwood, Lymm and Winwick can know about this but we know nothing. Where has the information been? Why are we the last to know? Why has there be now information roadshows been held?

I expect you as my local councillors to fight against this proposal I expect you to arrange a meeting/meetings for the people who live in the area and I also expect you to be in contact with our MPs to get behind the fight against this stupid idea

Yours sincerely,
