> To whom it may concern,

> Please register this email as my complete and absolute objection to every aspect of the proposed development plans for south warrington area.

> The scale of the development is so large that no additional infrastructure however comprehensive could cope with the extra volumes of people and transport that would be generated by it. Traffic volumes are chaotic at peak periods and whenever there is an issue with the motorway networks now, add the canal bridge openings and total gridlock will become the norm.

> Everything put on hold for twelve months with evidence from a fact based report/ consultation with a scaled down plan that contains legally binding guarantees for the infrastructure to be provided and payed for by the developers. I.e. Schools, roads extra medical facilities etc would be the only way forward acceptable to myself.

> Yours sincerely
