re Garden City Suburb and South West Extension.

From the early days of the New Town Development Corporation it was always accepted as fact that any development to the south of the ship canal would absolutely necessitate at least one new bridge over the Bridgewater and Ship Canals, and much additional road infrastructure. Without this, and other provisions, any additional housing will create untenable traffic congestion in all southern parishes. Any Council who willingly inflict this burden on their residents are clearly guilty of criminal negligence.

yours sincerely
