Modification response

Which main modification or consultation are you responding on?

Schedule of proposed main modifications 2023

Is the main modification legally compliant?

No

Why do you consider it is not compliant (max 2000 words)

It possibly is but might well not be - it is unfair to ask a member of the public who has no legal experience to answer either Yes or No. In my opinion it is a very leading question where one without legal knowledge will have to answer Yes.

Is the main modification sound?

No

Why do you consider it is not sound (max 2000 words)

I do not consider the modification to be sound.

We as a country are suffering and struggling to get even the basic foods and grains to meet our needs, Yes the war in Ukraine has exacerbated our situation as has Brexit most likely but unfortunately it is a fact of life that we are not producing enough for our needs and are reliant on importing crops.

Are we really proposing to remove acres and acres of fertile agricultural land which produces tons and tons of crops each year in order to build houses?? If so, it is scandalous.

Surely we should be preserving and cultivating as much agricultural land as possible in order to become as self reliant on crops as we are striving to be with energy.

Have we learnt nothing over the last 12 months??

Detailed response and document upload

Detailed response to main modification (A maximum of 5000 words, which equates to roughly 10 sides of A4 paper)

I do not consider the modification to be sound.

We as a country are suffering and struggling to get even the basic foods and grains to meet our needs, Yes the war in Ukraine has exacerbated our situation as has Brexit most likely but unfortunately it is a fact of life that we are not producing enough for our needs and are reliant on importing crops.
